anu bandi

	EDUCATION	
2009 – 2013	University of Maryland, College Park	
	Bachelor of Science in Computer Science & Mathematics	
	Enrolled in Honors ProgramAwarded President's Scholarship	
	- Awarded Fresident's Scholarship	
	EXPERIENCE	
2014 – present	Google	Mountain View, CA
p	Software Engineer	
	Worked on personal search team to enable various personal results on google.com	
	 Modified frontend and backend components in the search stack using c++ & java Analyzed user behavior to improve ranking and result quality 	
	Analyzed user behavior to improve ranking and result quality	
summer 2013	Microsoft	Redmond, WA
	Program Manager Intern	
	 Designed a Java SDK that provides Azure service management ability through REST calls Wrote a functional spec with API signatures, competitor analysis, and code samples 	
summer 2012	IBM	Durham, NC
	Extreme Blue Intern	Damanyrte
	 Developed a virtual machine OS updating infrastructure for private clouds 	
	 Wrote a software component for IBM Workload Deployer in python 	
summer 2011	Google	Mountain View, CA
	Software Engineering Intern	
	 Implemented a backup system for OneGoogle library (3,000,000,000+ requests daily) 	
2011 – 2013	 Implemented a backup system for OneGoogle library (3,000,000,000+ requests daily) Modified the OneGoogle Java library, C++ backend, and python scripts UMD Computer Science Dept. 	College Park, MD
2011 – 2013	 Implemented a backup system for OneGoogle library (3,000,000,000+ requests daily) Modified the OneGoogle Java library, C++ backend, and python scripts UMD Computer Science Dept. <i>Teaching Assistant</i> 	College Park, MD
2011 – 2013	 Implemented a backup system for OneGoogle library (3,000,000,000+ requests daily) Modified the OneGoogle Java library, C++ backend, and python scripts UMD Computer Science Dept. <i>Teaching Assistant</i> Courses: CMSC132H (Object-Oriented Programming II), CMSC351 (Algorithms) 	College Park, MD
2011 – 2013	 Implemented a backup system for OneGoogle library (3,000,000,000+ requests daily) Modified the OneGoogle Java library, C++ backend, and python scripts UMD Computer Science Dept. <i>Teaching Assistant</i> 	College Park, MD
2011 – 2013 2011 – 2013	 Implemented a backup system for OneGoogle library (3,000,000,000+ requests daily) Modified the OneGoogle Java library, C++ backend, and python scripts UMD Computer Science Dept. <i>Teaching Assistant</i> Courses: CMSC132H (Object-Oriented Programming II), CMSC351 (Algorithms) Assisted the professor in grading. Helped students master course material UMD Math Success Program 	College Park, MD College Park, MD
	 Implemented a backup system for OneGoogle library (3,000,000,000+ requests daily) Modified the OneGoogle Java library, C++ backend, and python scripts UMD Computer Science Dept. Teaching Assistant Courses: CMSC132H (Object-Oriented Programming II), CMSC351 (Algorithms) Assisted the professor in grading. Helped students master course material UMD Math Success Program Head Math Coach 	-
	 Implemented a backup system for OneGoogle library (3,000,000,000+ requests daily) Modified the OneGoogle Java library, C++ backend, and python scripts UMD Computer Science Dept. Teaching Assistant Courses: CMSC132H (Object-Oriented Programming II), CMSC351 (Algorithms) Assisted the professor in grading. Helped students master course material UMD Math Success Program Head Math Coach Supervised math coaches and led staff in providing exceptional tutoring services 	
	 Implemented a backup system for OneGoogle library (3,000,000,000+ requests daily) Modified the OneGoogle Java library, C++ backend, and python scripts UMD Computer Science Dept. Teaching Assistant Courses: CMSC132H (Object-Oriented Programming II), CMSC351 (Algorithms) Assisted the professor in grading. Helped students master course material UMD Math Success Program Head Math Coach 	-
